

PUBLIC POLICY PLAN

Acción Climática

The Public Policy plan is developed by the completion of a questionnaire, in which AC can identify the specific needs or main problems of the company related to Colombian, Peruvian and / or Chilean environmental and climatic regulations that may currently affect or benefit the affiliate operations.

BENEFICIOS

- Research on climate and environmental initiatives, laws, regulations that are useful for the company.
- Incidence in the creation and modification of regulations.
- Creation of workshops or connection with already existing ones that work actively to generate a positive impact on the formulation of environmental and climatic regulations with public and / or private sector organizations.
- Management of meetings with organizations and individuals leading initiatives with incidence in the subject of interest.
